

Overview

Submit Credit API allows you to submit a credit transaction to send money to the customer. This document should be referred only if you are utilizing FXRates API. FXRates API allows the merchant to award equivalent USD amount for ARS amount to the consumer. The API requires HMAC signature, please refer to *API Authentication* for more information about the signature.

API Endpoint	https://{server.com}/api/v3/credits
Method	POST
Content Type	Application-json

Payment Flow

- 1. The merchant submits the credit request to Payamigo platform
- 2. The Payamigo platform submit the payout request to bank.
- 3. Bank response to Payamigo successfully, the transaction is in pending/credited status
- 4. The Payamigo platform responses to the merchant, with transaction status.
- 5. If transaction is in pending status, Bank notifies Payamigo the final transaction result.
- 6. The Payamigo platform notify the merchant the final credit result

Refer to Real-Time Notifications for more information about the notification.

Request Parameters

Field	Required	Description
command	Υ	Fixed as "CREDIT"
id	Y	1-100 chars, letter,number and hyphen are allowed. The unique transaction ID specified by the merchant. It fails if a 2nd credit request with the same transaction ID
customer.id	Y	1-100 chars, letter,number and hyphen are allowed. Customer id specified by the merchant. For a same customer please use the same ID, it helps CS to identify fraud
